It is extremely important and useful to identify an individual's Natural Behavioural Profile in order to allow to predict how much effort these competencies will require. Whether the individual will be able to display them naturally, spontaneously and effortlessly or whether they will require a greater effort because they are not natural to the individual. For example, a "naturally impatient and restless" individual will have to make a greater effort in the "Analytical Skills" competency, while the "Sense of Urgency" competency will be a natural skill and will, therefore, require the least effort.
